Traditional annuities can be expensive to fund, but the most flexible can also be the most expensive, limiting investment options. Each option requires a different set of restrictions, so it's essential to understand what choices are available to you before you purchase. Often referred to as a deferred annuity, a traditional annuity is designed to give investors a steady stream of income for life. This type of annuity is probably best suited for retirees looking to provide a constant stream of income for life. The least expensive way to buy an annuity is a combination annuity. These are either fixed or variable, and they usually combine both life and income with an amount guaranteed at any time. For example, a 50-year-old couple buying an annuity today might invest \$10,000 for their life and \$10,000 for their income. These funds would be paid out over time in 20-year increments, and the couple would receive a steady income for the remainder of their lives. Other less common variations include premium bearing life and income annuities. Both of these types of annuities offer a lump sum that is guaranteed at any time. The difference is that in the life and income annuity, the annuity will only be used for income, while in the premium bearing life and income annuity, the money can be invested to provide income at any time. You have many other choices for funding an annuity. You can pay the premium all at once and begin receiving monthly income, you can 82157476af
